

FIBRE SPLICER

NEW Training and Skills Certification

High speed internet is coming to Essex County and other municipalities across Ontario with a population of 100,000 and less. Several hundred thousand homes will be wired with fibre optic cable over the next five years - an excellent opportunity for Members with utilities skills to upgrade, and those interested in adding a new skill set to expand their career.

LiUNA!625 will determine the need for a new FIBRE SPLICER course based on Member response to an Open House and Demonstration. Todor Manailov, owner of GITO Fibre Optic Consulting, a LIUNA signatory and technician with Advanced Wiring Solutions will host the demonstration. Various stations will be set up at the Training Centre to provide an overview of the training and skills required to obtain the Fibre Splicer Certification.

YOU'RE INVITED TO ATTEND.

OPEN HOUSE & DEMONSTRATION

**Saturday, January 27, 2018
10:00 am – 2:00 pm**
